University Degree in Computer Programming

National University of San Martin (UNSAM)

2020 - present

Fullstack Web Development

Apx School

2021 - present

Experience

Chatrooms (personal project).

2023

WebApp, front-end & back-end

- Whatsapp clone for desktop. Allows to create rooms for chatting in real time.
- Role: Complete development of the page. I've used React, Typescript, Next, Redux toolkit, Tailwind and Firebase.

E-commerce (Apx School project).

2022

WebApp, front-end & back-end

- Final project of the fullstack web development degree. It is a furniture ecommerce, where you can make purchases with mercadopago test accounts.
- Role: complete development of the page. In the front-end ReactJS, Typescript, Next.js, Styled Components were used.

Soft Skills

Creativity

Effective communication
